Supply and Delivery of Plaques to be used during the Pandemic Emerging Re-Emerging Infectious Diseases Summit 2023 of the City Health Office in the City of San Fernando, Pampanga

I. BACKGROUND

According to the Department of Health, the Philippines has seen many outbreaks of emerging infectious diseases and is susceptible to re-emerging infections such as leptospirosis, dengue, meningococemia, and tuberculosis. The current situation emphasizes the risks and highlights the need to improve local, national, and international preparedness against future pandemics. New pathogens will continue to emerge and spread across regions, challenging public health as never before signifying grim repercussions and health burden. These may cause countless morbidities and mortalities, disrupting trade and negatively affecting the economy.

In addition, Emerging and Re-emerging Infectious Diseases are unpredictable and create a gap between planning and concrete action. To address this gap, there is a need to come up with proactive systems that would ensure preparedness and response in anticipation of negative consequences that may result in pandemic proportions of diseases.
