Supply and Delivery of Meals to be served for the Integrated Management of Childhood Illnesses Training of the City Health Office for 2024 in the City of San Fernando, Pampanga

I. BACKGROUND

According to the World Health Organization (WHO), Integrated Management of Childhood Illness (IMCI) is a systematic approach to children's health which focuses on the whole child. This means focusing not only on curative care but also on the prevention of disease.

Philippines has one of the highest Infant Mortality Rate and Under Five Mortality Rate compared to neighboring countries in East Asia. One child dies for every 4.4 percent of deaths among all ages. Pneumonia, diarrhea, measles and malnutrition or combinations of these conditions are the most common causes of child deaths. Although these conditions are preventable, they continue to be the top health problems among children.

Annually, the city procures medicines, given to children diagnosed with childhood illnesses such as diarrhea, pneumonia and upper respiratory tract infections to prevent morbidity and mortality of the said childhood illnesses.
